18	how fast does dulcolax suppositories work	This web site has great easy to read diagnostics for pool equipment services, THANK YOU I have a question: My pool equipment has been working great, aside from clogs from debris, but 1 day My 3x year old 2HP pool motor won't start? The impeller is spinning freely, I checked the starter capacitor with a multi meter & it seems to be working ok & even changed it with another of the same, Fuse panel is ok, the pool timer appears to be working, but when I flip the pool timer switch to "on", a "electric" click sound comes from where I think is the pool heater, & the pool motor does nothing, & doesn't even try to start? I'm not sure how to check to see if the motor is receiving power though? The motor was replaced a few years ago, and has not given any signs of wearing out? Please help me, I'm going crazy with this? Thx, Peter
