For a long time I have been mentioning that the time will come when companies won't find anyone here in the USA with a technical background ... and then what? Are they going to bring all of the India population here to the USA and start from zero? Imagine recent grads with no experience at all and universities not being able to teach all the applications available in industry (universities lag about 20 years behind industry); so, that translate to students not going for any technical curriculum
