Ook ik gebruik al jaren antidepressiva. Sommige hadden al in het begin enorm veel bijwerkingen, waarvan ik hier eentje noem; effexor, waar ik binnen twee weken 10 pond bijkwam. Het branden in de mond was niet te harden. Dan nog een reeks die helemaal niks deden; zolofit waar ik een giga hoge bloeddruk kreeg, wat de arts niet geloofde; na het stoppen hiermee was mn bloeddruk binnen een paar dagen normaal. Om een (enorm) lang verhaal kort te maken. Aan de seroxat, waar ik me na een paar weken beter op voelde, maar mn gewicht schoot omhoog; hierop een enorm verhoogd cholesterol; hiervoor aan de statines; waardoor ik het zo benauwd kreeg dat ik dacht te stikken en amper kon lopen. Verder zag ik er uit als een michelinpoppetje. Ik werd uitgescholden, gepest, en mensen die me lang niet gezien hadden; (lachend) wat is er met jou gebeurd?? kleding kopen een ramp, zelfs op de dikzakkenafdeling van miss etam niks wat past. Daarnaast een blijvend gevoel van depressie en angst, waar de arts "niks mee kon" Ben te einde raad, en bezig met zaken als Brahmi, en dergelijke. Het eind van deze hel is nog lang niet in zicht, en het gebruik van de ene pil lokt het gebruik van andere uit. Relatie op de klippen gelopen, omdat ik nergens meer heen durfde. Renske

Consumer feedback is gathered through confidential face-to-face surveys and questionnaires, as well as focus groups.? All survey tools are "service specific" and can be linked to a provider agency.? As feedback is gathered, reports are generated and sent to the provider and its funding source.? After a report is finalized, CFST initiates an accountability meeting.? This follow-up process allows CFST to highlight positive outcomes from surveys, as well as discuss with the provider recommendations for quality improvement.
